

## **GOODWIN BIOTECHNOLOGY INC. COMPLETES cGMP MANUFACTURING OF AREVA Med's CONJUGATE**

USA - Plantation, FL, September 14<sup>th</sup>, 2009 – **Goodwin Biotechnology Inc.** (GBI) announced today the completion of the cGMP manufacturing and vialing of AREVA Med's monoclonal antibody-chelator conjugate. As part of AREVA Med's Lead-212 (212Pb) initiative, the conjugate will be used in Phase I clinical trials to treat several types of deadly forms of cancers. AREVA Med will benefit from the vast expertise in the nuclear industry from AREVA, its parent company, that allowed for the production of this radioisotope previously considered a scarce resource.

David Fischer, EVP of GBI, said "We are very pleased to have completed the manufacturing of AREVA Med's conjugate. After some promising pre-clinical data, we look forward to seeing the outcome of the first in man studies."

### **About Goodwin Biotechnology Inc.**

GBI is one of the earliest biologics contract manufacturing organizations (CMOs), established in 1992. GBI specializes in process development and cGMP compliant mammalian cell culture manufacturing of bio-therapeutics for pre-clinical studies and clinical trials. GBI's clients include small to midsized biotech companies throughout North America and Europe, as well as universities, renowned cancer research institutes and various branches of the U.S. government. GBI offers its clients the experience of an established U.S. Contract Manufacturing Organization, and provides services in a fully integrated offering, including process development, cell banking, cGMP manufacturing, conjugation, vialing, and distribution to the clinical trial sites.
